

S³ Self Service Simplified

The world of retail has changed. Customers are demanding more Self-Service shopping experiences that engage their expectations. At the same time, front-end operational efficiencies must be maximized. On top of this, yesterday's patchwork of in-store solutions won't get you to the Unified Commerce finish line. This is where Fujitsu S3 Solutions comes in.

S3 SOLUTIONS

S3 solutions are designed to simplify integrating, deploying and even developing Self-Service solutions. S3 is a suite of modular software and hardware building blocks designed to be used together for complete in-store solutions or integrated individually into a retailer's existing estate to augment their in-store capabilities. [Learn more](#)

With S3, retailers can now easily deploy a consistent customer interface across all in-store technology, increasing adoption rates by minimizing the friction of learning curves. One data source, one suite of products, one customer view - S3 is Unified Commerce for Self-Service. [Learn more](#)

S3 INTEGRATION

More than 20 years of retail integration expertise is now available for all Self-Service solutions. S3 provides three integration packages to meet the needs of retailers no matter the platform, system or application.

HARDWARE

Fujitsu S3's suite of hardware solutions are built for one goal: simplify Self-Service solutions. Combined with S3 integrations, Fujitsu Self-Service hardware is among the most flexible, adaptable and reliable systems on the market today.

S3 automated cash management solutions allow one common payment module to be deployed at the POS lane, for a convertible lane, as a payment station, or a full SCO. Using a common module reduces management costs, simplifies integration, improves deployments and ensures your customer always has a consistent experience.

[Learn more](#)

Elite

Built with the SmartCASH as its foundation, Elite is the most adaptable Fujitsu self-checkout ever with hundreds of configuration options. Why choose ordinary when you can choose Elite?

SmartCASH™

The most compact recycler with maximum capacity on the market today. SmartCASH is designed to be deployed as easily for in-counter POS cash automation system as a complete standalone SCO system.

Verso

With Verso Convertible POS lanes, a manned lane can be converted to Self-Service at the click of a button. Verso ensures all lanes are open to customers at all times.

QSS

QSS integrates into existing POS systems to provide a simple to deploy food ordering solution. The S3 common interface ensures the customer's experience is familiar and seamless so staff can focus on order fulfillment.

Bolt

Fujitsu's smallest Self-Service system works seamlessly with all S3 solutions. No matter the application, Bolt lets a retailer drop in a solution anywhere a customer can serve themselves. Just Bolt it and forget about it.

RFID Self-Checkout

Using state-of-the-art technology, Fujitsu's RFID Self-Service solutions reduce checkout times to seconds. RFID self-checkout eliminates friction for customers and allows staff to focus on what really matters: the customer experience.

SOFTWARE

Learning curves create frustration, and frustration creates lost customers. S3 software solutions are developed to provide the intuitive experience today's customers expect with the consistent interface that keeps driving adoption.

U-Shop

U-Shop mobile POS allows customers to choose a fully autonomous shopping experience. With Scan'n'Go, customers engage with retailers on their own terms, on their own devices.

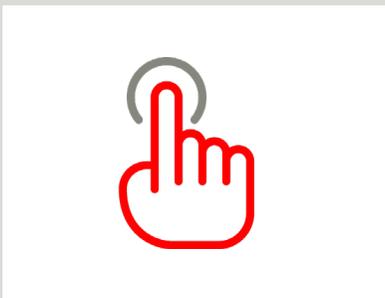

A.I. Machine Vision

Self-Checkout lanes augmented with machine-learning solutions for product recognition and enhanced security reduce friction, improve customer satisfaction, and allow retailers to maximize their existing investments.

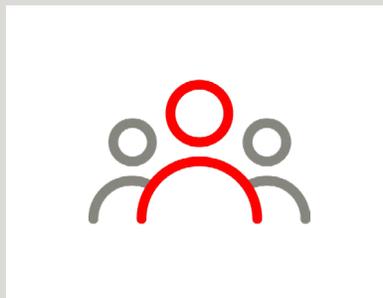

Biometrics

Fujitsu's suite of multi-modal biometric authentication products includes PalmSecure palm vein authentication, which provides a fully contactless experience that reduces contact with shared surfaces and improves hygiene.

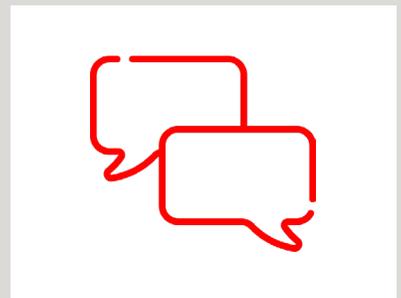

U-Scan

U-Scan SCO software continues its 20-year lead of the self-service industry.

Integro

Simplify in-store support with on-sight tools that train and automate your staff.

Taskforce

Empower staff and augment store systems with event-driven communications.
