

Fujitsu Loss Prevention

Fujitsu Loss Prevention is the first SAP-native loss prevention solution for retailers to detect and prevent fraud and business-process deviations in real-time. This state-of-the-art, highly scalable solution has an intuitive interface – and works out of the box with most common retail scenarios – reducing significant annual profit losses for retailers. The Fujitsu Loss Prevention solution is now available directly from SAP as a partner solution.

MONITOR

Robust reporting enables retailers to monitor and measure fraud prevention activities and process anomalies.

PREVENT

Reduce suspicious anomalies, prevent and detect business process issues and identify fraud earlier to minimize loss and shrinkage.

 SAP CAR

INVESTIGATE

Predefined reports and exploratory analyses offer retailers a dynamic evaluation of point of sale data.

DETECT and ALERT

Detect irregularities at the point of sale by using a retailer's unique rules and patterns, enabling further investigation of anomalies using an intuitive user interface.

Situation

Loss Is Increasing

In 2018, retailers lost an average **1.38%** of sales due to irregularities

Supplier fraud

Administrative errors

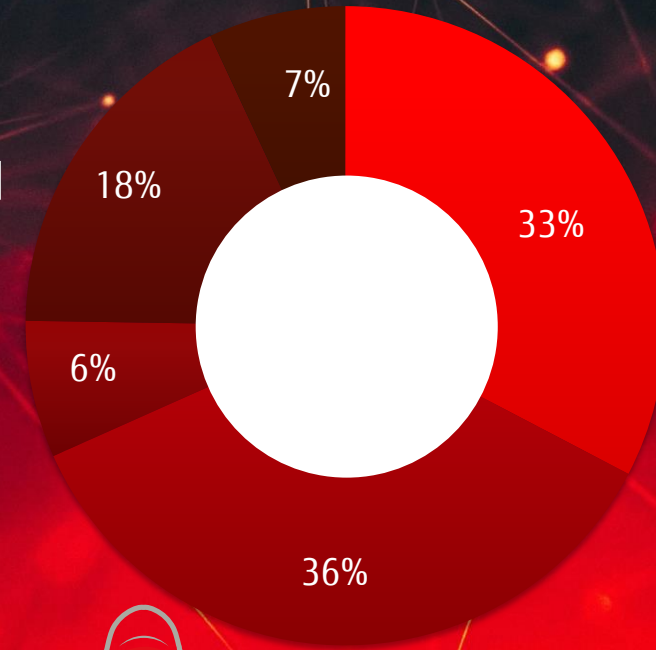

Employees
(approx. 0.44 % of sales)

Unknown

Shoplifting

Be proactive across the environment, minimize loss
